

LES RENCONTRES DE LA CHIMIE DURABLE

Au croisement de la chimie verte et du développement durable

US and EU Economic and Policy Issues Relevant to Biofuels

Pr Wallace TYNER

Professor of Agricultural Economics, Purdue University

*2007 : “Energy Patriot” award for contributions to energy policy analysis
2002-2003 Visiting Professor in Montpellier (IAMM, INRA, and University)
1989-2002 Head of Department Agricultural Economics, Purdue Univ.*

Vendredi 10 Octobre 2008 - 9h45

Amphithéâtre 206

*Montpellier SupAgro – 2, Place Viala
(Bât 9, campus de la Gaillarde)*

This seminar will explore the integration of energy and agricultural markets brought about by US and EU government incentives plus the increasing price of crude oil. We will examine the impacts of government subsidies and biofuels mandates and see how the policies differ. We will also examine the global changes in agricultural production, trade, and land use induced by US and EU biofuels programs. Finally, we will explore some of the major drivers of food price increases and discuss the relative importance of biofuels.
